This weekend I built =GPT3(), a way to run GPT-3 prompts in Google Sheets.

It's incredible how tasks that are hard or impossible to do w/ regular formulas become trivial.

For example: sanitize data, write thank you cards, summarize product reviews, categorize feedback...

Holy cow, this would be a true game-changer for us. We have SO much contact data to clean up. I'd sign up in a heartbeat!! Let me know how I can help.

💬 3 ↻ 🗨️ ❤️ 26

There are all sorts of services dedicated to do that.
