### README.md

# beardedtek-com/tailscale

Tailscale container that acts as a subnet router for a docker network.

It uses a script to scrape the container's docker network and automatically enable --advertise-routes

add this service under services to add tailscale functionality to the docker network

```
# Provides tailscale functionality for the stack
```

```
tailscale:
  image: beardedtek-com/tailscale:dev
  container_name: tailscale
  restart: unless-stopped
  privileged: true
  volumes:
    - ./varlib:/var/lib
    - /dev/net/tun:/dev/net/tun
  cap_add:
    - net_admin
    - sys_module
  environment:
    - TAILSCALE_AUTHKEY=${TAILSCALE_AUTHKEY}
    - TAILSCALE_HOSTNAME=${TAILSCALE_HOSTNAME}
    - TAILSCALE_TAGS=${TAILSCALE_TAGS}
```

- TAILSCALE\_ADVERTISE\_ROUTE=\${TAILSCALE\_ADVERTISE\_ROUTE}
- TAILSCALE\_ENABLE=#{TAILSCALE\_ENABLE:-true}

Values can be set in a .env file:

```
# Obtain tailscale auth key from:  
# https://login.tailscale.com/admin/settings/keys  
TAILSCALE_AUTH_KEY=tskey-XXXXXXXXXXXX-XXXXXXXXXXXXXXXXXXXX  
TAILSCALE_HOSTNAME=sidecar-service  
TAILSCALE_TAGS=  
TAILSCALE_ADVERTISE_ROUTE=  
TAILSCALE_ENABLE=true
```
