## Watch Brief Intro Video

ELI5: CG/SQL

# Key Features

## **Stored Procedures Made Easy**

Create highly complex stored procedures with very large queries, without the manual code checking.

## **Take Control of the Schema**

Manage and upgrade your schema automatically with the annotation system of CG/SQL.

## **Create Well-Tested Code**

Ensure SQLite API's and the schema's consistency with annotated procedures.

**See CG/SQL in Practice**

## CG/SQL Demonstration 1: Introduction
