

New Tremor v3.0: Theming & Darkmode →

The React library to build

```
ProgressBar.tsx  
  
<Card>  
  <Flex alignItems= "start" >  
    <Block>
```

Built on top of:

Modular components to build dashboards in a breeze. Fully open-source, made by data scientists and software engineers with a sweet spot for design.

Get started

npm install @tremor/react 

20+ components • Apache-2.0 license • TypeScript Support

Trusted by great engineering teams

Some examples built
with the library:

Total Sales

 23.1%

\$ 442,276 from \$ 382,482

Vienna

Valencia

Product A

\$ 100,838 (38%)

Product B

\$ 90,224 (34%)

Product C

\$ 74,301 (28%)

KPI Cards

Data bars, metric cards, or delta badges are put together to show summarizing information of data.

Profit Performance

April 2022

↑	Switzerland	\$ 453,963
↘	Norway	\$ 25,093
↗	Germany	\$ 73,661

Lists and Tables

Modular lists and tables that go along with badges, icons, or visualization elements.

Population growth rate

From 1951 to 2021 • ourworldindata.org

Charts

Charts are hard, so we already pushed the pixels that you can focus on data. A set of basic charts ready to be fed by data. No need to take care of the grunt work.

Lena's Webshop

Uptime

99%

Advanced Visualizations

tooltip bars, performance monitors, and many more components to visualize complex use cases gracefully.

Powerful Utilities and More...

Buttons, icons, inputs, date picker, layout elements, tabs, page shells, and many more components to build interfaces.

Already loved by developers from all over the world

Guillermo Rauch

CEO @ Vercel

Tremor makes it so easy to build beautiful dashboards. The ReactJS / Next.js ecosystem just keeps getting better and better 🥰

Geordi Dearn

Engineering Manager @ Mentimeter

Super excited to see the Tremor release, Looking forward to using it in my side projects and maybe internally at Mentimeter :) it looks fantastic

Dries Augustyns

Founder @ useplunk

It is a solid 10/10 for me and I am sure this project will take over the dashboarding business in the upcoming months!

Alasdair Brown

DevRel Lead @ Tinybird

I am in love with the @tremorlabs viz library & we've been working to adopt it in our Starter Kits. Today we merged the migration to Tremor in our Web Analytics Starter Kit. It's beautiful 🥰

ProgressBar.tsx

```
<Card>
  <Text> Ticket Sales </Text>
  <Metric> $ 71,465 </Metric>
  <Flex className= "mt-3" >
    <Text><Bold> 32% </Bold> of annual target </Text>
    <Text> $ 223,328 </Text>
  </Flex>
  <ProgressBar value= { 32 } className= "mt-3" />
</Card>
```

Ticket Sales

\$ 71,465

32% of annual target

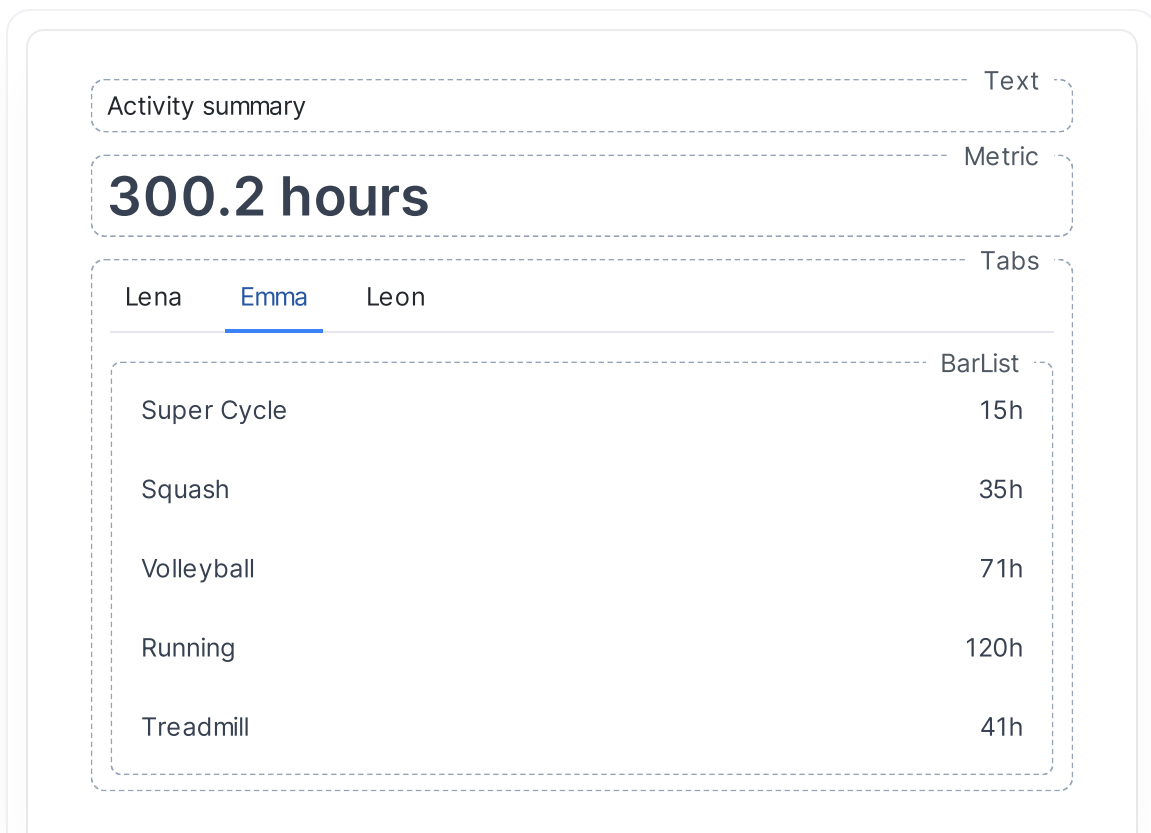

\$ 223,328

 COMBINES DESIGN AND ANALYTICS

Never build dashboards from scratch again

Creating analytical interfaces is hard. We have distilled all our knowledge from building dashboards into Tremor. Besides our components, we provide a variety of templates built on top of Tremor to give developers a head start on building great interfaces.
