

## stream : Real-time Whisper transcription in WebAssembly

You can find more about this project on [GitHub](#).

**More examples:** [main](#) | [bench](#) | [stream](#) | [command](#) | [talk](#) |

---

Select the model you would like to use, click the "Start" button and start speaking

Whisper model:

Quantized models:

Status: **not started**

[The transcribed text will be displayed here]

---

Debug output:

---

---

## Troubleshooting

The page does some heavy computations, so make sure:

- To use a modern web browser (e.g. Chrome, Firefox)
- To use a fast desktop or laptop computer (i.e. not a mobile phone)
- Your browser supports WASM [Fixed-width SIMD](#)
