

# Marten

## .NET Transactional Document DB and Event Store on PostgreSQL

Pragmatic library to boost your developer  
productivity!

[Get Started](#)[Configuration](#)[Document DB](#)[Event Store](#)

### PostgreSQL

Use proven PostgreSQL database engine, its fantastic JSON support and ACID compliance as the underlying data store.

### Document Database

A robust and full-fledged document database to boost your developer productivity.

### Event Store

Build event-sourced style systems with ease to store events and streams. Use projections to create read-side views.
