The screenshot displays the PocketBase admin interface. On the left is a sidebar with a search bar for collections and a list of collections: users, posts (selected), and messages. A '+ New collection' button is at the bottom of the sidebar. The main area shows the 'posts' collection with a search filter and a table of records. The table has columns for id, title, description, active status, options, and featured images. A 'Live demo' watermark is visible over the table. At the bottom right, it says 'Showing 3 of 3'.
