

# About

This is an alternative frontend to [Reuters](#). It is intended to be lightweight, fast and was heavily inspired by [Nitter](#).

- No JavaScript or ads
- No tracking
- No cookies
- Lightweight (usually <10KiB vs 50MiB from Reuters)
- Dynamic Theming (respects system theme)

You can install [libredirect](#) or [this browser extension](#) to automatically forwards all reuters links to this site.

This is a work in progress. Please report any bugs or suggestions at [GitHub](#).

## Contact

If you have any questions, feel free to contact me at [admin@boxcat.site](mailto:admin@boxcat.site).

## Credits

- [maud](#), a fast and intuitive inline html macro

## License

This project is licensed under the [GNU Affero General Public License](#).

## Build information

This version is based off the git commit [5d145dad144ba7ca0f244ab634724fdcd9dde81e](#)
